

# LISAN SIDQI, S.KOM

## HARDWORKING IT PROFESSIONAL

📍 Bekasi, West Java, Indonesia | 📞 085882198994 | ✉️ Lsidqi51@gmail.com  
🔗 [linkedin.com/in/lisan-sidqi-02397685/](https://www.linkedin.com/in/lisan-sidqi-02397685/)

## PROFESSIONAL SUMMARY

A disciplined and highly adaptable Bachelor of Information Technology graduate with a Cum Laude predicate. Passionate about software development and eager to continuously learn new technologies. Possesses a strong foundation in Computer Science with over 5 years of experience as a Fullstack Developer specializing in high-performance enterprise applications and the healthcare industry. Adept at orchestrating Agentic AI workflows to accelerate full-cycle software development and deliver scalable architectures.

## WORK EXPERIENCE

### Fullstack Engineer & Systems Architect

May 2026 - Present

Freelance / Independent Contractor

- **Enterprise Resource Planning (ERP) System:** Architected and developed a large-scale, high-performance ERP platform from scratch to centralize B2B operations, including POS, Inventory Management, Procurement, HR, and Core Accounting (General Ledger).
- **Performance Optimization:** Resolved critical memory exhaustion and timeouts by designing analytics microservices using Golang (Fiber) and In-Memory Caching (Redis), drastically reducing report generation time for tens of thousands of rows from 20+ seconds to under 1 second.
- **AI Integration:** Engineered an advanced split-view Point of Sales (POS) interface integrated with a local AI Assistant (Google Gemini & Ollama) utilizing Fuzzy Search and RegEx for highly accurate item recommendations.
- **Database Management:** Designed a robust PostgreSQL database structure, pruned inefficient data objects, and implemented periodic index reorganizations to significantly boost query execution speeds for heavy transactions.
- **Enterprise Security:** Implemented comprehensive security protocols including Laravel Sanctum for stateful SPA authentication, custom Role-Based Access Control (RBAC) middleware, and strict session management to prevent unauthorized access.
- **Tech Stack:** Laravel 11, PHP 8.2, Laravel Octane (Swoole), React.js, Inertia.js, Tailwind CSS, Golang (Fiber), PostgreSQL, Redis, Docker, AI (Gemini & Ollama).

### Frontend Developer

July 2026 - Present

Freelance / PT. Abbasy Anugerah Perkasa – Depok

- **Corporate Website & Headless CMS:** Developed a high-performance, fully dynamic corporate website enabling non-technical staff to independently modify content through Decap CMS (Git-based Headless CMS).
- **System Architecture:** Designed and implemented a 3-layer anti-blank-page architecture to resolve aggressive edge caching conflicts from Cloudflare, ensuring 100% uptime during deployments and content updates.
- **Modern UI/UX:** Implemented a modern, responsive user interface featuring glassmorphism effects, auto-collapsing navigation, and smooth scroll animations utilizing Framer Motion.
- **SEO Optimization:** Optimized technical SEO by embedding Schema.org structured data (Organization & WebSite potentialAction) and managing custom cache headers, maximizing Google Search visibility.
- **Tech Stack:** React.js, Vite, Decap CMS, Cloudflare Pages, GitHub Actions (CI/CD), Framer Motion, Vanilla CSS.

SIMRS TEN – Bekasi

- **Hospital Information Systems (SIMRS):** Developed, maintained, and deployed systems for 7+ healthcare facilities, including RS. Amanda Mitra Keluarga, RS. Medirossa 2 Cibarusah, RS. Bhakti Husada Cikarang, RS. Fikri Medika Karawang, RS. Annisa Cikarang, and RS. PELNI Jakarta.
- **System Optimization:** Resolved critical system bugs and optimized database performance, ensuring high system uptime for daily hospital operations.
- **API & Database Architecture:** Built and integrated RESTful APIs and managed complex database architectures to support healthcare data management using PHP, MySQL, and SQL Server.
- **Mobile Development:** Developed online hospital registration mobile applications for multiple healthcare facilities, enhancing patient accessibility and streamlining the appointment booking process.

IT Helpdesk – Internship

2018

PT. Kabelindo Murni Tbk (PERSERO) – Jakarta

- **IT Support & Troubleshooting:** Assisted with hardware and software troubleshooting for Personal Computers (PCs) across the company.
- **System Maintenance:** Analyzed and maintained the Moodle Application Management Information System (MIS).
- **Daily Operations:** Handled daily IT Support operations and provided prompt technical assistance to staff.

SKILLS

|                         |                                                                                                                        |
|-------------------------|------------------------------------------------------------------------------------------------------------------------|
| Programming Languages:  | PHP, JavaScript, Golang, Java                                                                                          |
| Frameworks & Libraries: | Laravel, React.js, Next.js, Inertia.js, Vite, Tailwind CSS, Framer Motion                                              |
| AI Agentic:             | Openclaw, Openhands, Gravity                                                                                           |
| Databases & Cache:      | MySQL, SQL Server, PostgreSQL, Redis                                                                                   |
| Tools & Methodologies:  | Docker, Git (GitHub Actions/CI-CD), Cloudflare Pages, Decap CMS, Hardware & Software Troubleshooting, Microsoft Office |
| Languages:              | Indonesian (Native), English (Advanced)                                                                                |

EDUCATION

|                                       |             |
|---------------------------------------|-------------|
| Bachelor of Information Technology    | 2014 - 2019 |
| Mercu Buana University, Jakarta       |             |
| • GPA: 3.60 / 4.00 (Cum Laude)        |             |
| Marketing (Accounting and Management) | 2011 - 2014 |
| SMK Negeri 51 Jakarta Timur           |             |

TRAINING & CERTIFICATIONS

- Workshop of Machine Learning (Mercu Buana University, 2017)
- Web Programming Workshop (Mercu Buana University, 2017)
